SUMMARY

Software engineering graduate (A.A.S., 4.0 GPA) transferring to The Ohio State University for a B.S. in Computer Science and Engineering. Software Developer experience building internal ASP.NET/C# applications and SQL Server databases, complemented by full-stack and capstone project work across Node.js/Express, MongoDB, React, and TypeScript. Seeking software engineering, full-stack, or AI/ML internships.

EXPERIENCE

Software Developer

Cincinnati State Technical & Community College

January 2026 – Present

Cincinnati, OH

- Develop and maintain internal web applications using ASP.NET MVC and C# within an Agile/Scrum team, working across the full software development lifecycle.
- Build and maintain SQL Server database solutions that support internal college systems and applications.
- Create reporting dashboards in Power BI and Tableau to make operational data accessible to staff and stakeholders.

Sales Associate

The Home Depot

2024 – Present

Cincinnati, OH

- Deliver customer service in a high-volume retail environment while maintaining accuracy under time pressure.

PROJECTS

Pantry Pal — Pantry Scanner & Inventory Application

Capstone · Team of 4

Cincinnati State — Agile/Scrum capstone

- Co-developed the front-end of a pantry-scanner application that identifies pantry items and automatically adds them to a user's food inventory.
- Contributed to the pantry-scanner functionality and a QR-code workflow that lets users open the scanner on a mobile device and add items via the phone camera. (Backend built by teammates.)

Axel's GPR — Full-Stack Web Application

Node.js · Express · MongoDB

- Built a full-stack business website with a Node.js/Express REST API that persists customer estimate requests to MongoDB through Mongoose.
- Designed the REST API and secured the admin dashboard and estimate-listing routes with HTTP Basic Authentication and environment-based configuration.
- Implemented a rule-based bilingual (English/Spanish) support assistant that maps user questions to keyword-scored responses.

AlgoVision — Code-Structure Visualizer

MakeUC 2025 · Team

- Built at a hackathon: a browser-based tool that parses Python and C# source code and renders control-flow graphs, call graphs, and class diagrams.
- Engineered a client-side pipeline in React, TypeScript, and Vite, using Tree-sitter (WASM) and a Web Worker to build a language-agnostic intermediate representation rendered as Mermaid diagrams, with the Monaco editor for code input.

VehicleRental — Java OOP Application

Java · JDBC · SQL Server

- Built a Java vehicle-rental system with an object-oriented class hierarchy (a base vehicle class extended by car, motorbike, and trailer types) and JDBC connectivity to a SQL Server database.

EDUCATION

The Ohio State University

Fall 2026 – Present

Bachelor of Science in Computer Science and Engineering (CSE) — Columbus, OH

Cincinnati State Technical & Community College

Associate of Applied Science in Software Engineering Technology — GPA: 4.0/4.0

AI Foundations Certificate — University of Cincinnati, Digital Futures ExLAI Program (2025)

Graduated August 2026

AWARDS & HONORS

Dean's List, Cincinnati State — every semester (Fall 2024 – Summer 2026)

TECHNICAL SKILLS

Languages: Python, Java, C, C++, C#, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Libraries: ASP.NET MVC, .NET, Node.js, Express, React, Pandas, PyTorch

Databases: SQL Server, PostgreSQL, MongoDB

Developer Tools & Practices: Git, REST APIs, Power BI, Tableau, Agile/Scrum, SDLC
